🌐 Portfolio

SUMMARY

Unity Developer with **4+ years** of experience building high-performance gameplay systems and interactive applications across **Android, iOS, PC, WebGL, and VR**. Proficient in **C# and C++**, specializing in gameplay programming, AI, multiplayer networking, performance optimization, and scalable software architecture. Experienced in designing modular gameplay systems using **Clean Architecture, SOLID principles, and event-driven architecture** from prototype to production.

TECHNICAL SKILLS

Languages: C#, C++, Python, Java

Game Engines: Unity (Gameplay Programming, Editor Scripting, Prefabs, Scriptable Objects, Addressables, Animator), Unreal Engine (Blueprints)

Gameplay Programming: Character Controllers, Combat Systems, Inventory Systems, Animation, Physics, AI (State Machines, IK), UI Systems, Level Design

Software Engineering: Object-Oriented Programming, SOLID Principles, Design Patterns, Clean Architecture, Event-Driven Architecture

Networking: Photon PUN2, TCP/IP, UDP, RPCs, State Synchronization, Client-Server Architecture

Optimization: Unity Profiler, Frame Debugger, Memory Optimization, Object Pooling, Draw Call Reduction, Multithreading, Asynchronous Programming

Backend & SDKs: REST APIs, Firebase, JSON, Unity IAP, Web3Auth, AdInMo, AppLovin MAX

Platforms: Android, iOS, PC, WebGL, Meta Quest, SteamVR

Tools: Git, GitHub, Plastic SCM, Perforce, Rider, Visual Studio

PROFESSIONAL EXPERIENCE

•Unity Developer – Level 3

Nazara Technologies, India

Mar 2025 – Present

- Engineered realistic batting and bowling mechanics, reducing frame time from **22 ms** to **14 ms** on Android devices.
- Refactored to **Clean Architecture**, reducing code dependencies by **40%** and onboarding time by **50%**.
- Architected modular gameplay systems using **Scriptable Objects**, reducing feature implementation time by **30%**.
- Integrated Unity IAP v5 with secure purchase workflows, ensuring **100%** transaction reliability.
- Configured AdInMo and AppLovin MAX mediation, contributing to a **20%** increase in advertising revenue.
- Developed custom Unity Editor tools for asset validation and automated build workflows, reducing manual QA effort by **35%**.
- Sustained **60+ FPS** under heavy gameplay workloads through profiling, batching, object pooling, and asynchronous asset loading.

•Unity Developer – Level 2

Metaspace, Noida, India

Feb 2023 – Feb 2025

- Led development of multi-user 3D/VR experiences supporting **20+ concurrent users** while maintaining stable frame rates.
- Engineered AI-driven NPCs using hierarchical state machines and IK, improving player engagement by **40%**.
- Implemented combat, progression, and inventory systems, improving **30-day player retention** by **30%**.
- Developed real-time multiplayer gameplay using Photon PUN2 while maintaining perceived latency below **80 ms**.
- Integrated Firebase services and REST APIs, improving backend reliability and reducing crash-free session issues by **25%**.
- Integrated Web3Auth authentication, reducing onboarding abandonment by **15%**.
- Optimized production workflows, increasing team productivity by **15%** while contributing to a **25%** increase in project revenue.

•Unity Developer – Level 1

Oryggi Technologies, Noida, India

May 2022 – Feb 2023

- Developed VR training simulations achieving approximately **90%** real-world accuracy validated by domain experts.
- Designed reusable VR interaction systems across **3** simulation projects, accelerating development by **30%**.
- Reduced post-release defects by **15%** through structured playtesting and Unity Test Framework automation.

•Game Developer

Freelance, India

Jan 2021 – Apr 2022

- Published **15+** mobile games and applications on Google Play, achieving an average user rating of **4.5/5**.
- Delivered **5** cross-platform games for Android, iOS, and PC from prototype to production using Unity and Unreal Engine.
- Engineered gameplay mechanics, physics systems, and UI/UX features, achieving approximately **95%** client satisfaction.

PROJECTS

•Fire Safety Simulation Unity — C# — Meta Quest — XR Interaction Toolkit

- Developed a VR fire safety simulation featuring emergency scenarios, evacuation workflows, and realistic interactions.
- Optimized VR interactions and runtime performance for smooth user experiences on Meta Quest. **Demo**

•Dark World Unity — C# — AI — Physics — PC

- Built a physics-based puzzle-platformer featuring environmental storytelling, exploration, and AI-driven gameplay mechanics.
- Engineered gameplay systems, enemy AI, and UI across **5+** levels, enhancing the single-player experience. **Demo**

EDUCATION

•Bachelor of Science (Honours) in Computer Science & Game Development

Backstage Pass Institute of Gaming and Technologies, Hyderabad, India

Jun 2019 – Jun 2023
